University of Missouri-Columbia

Table F-2(continued)
Missouri Consumption of Energy by the Commercial Sector: 1960-2015
Part II — (physical units)

^aNatural gas as it is consumed; includes supplemental gaseous fuels that are commingled with natural gas.

^bLiquefied petroleum gases.

^cBeginning in 1993, includes fuel ethanol blended into motor gasoline.

^dIncludes small amounts of petroleum coke not shown separately.

^eConventional hydroelectric power. For 1960 through 1989, includes pumped-storage hydroelectricity, which cannot be separately identified.

N/A = Not available

R = Revised data

(s) = Physical unit value less than 0.5 or Btu value less than 0.05

Notes: Totals may not equal sum of components due to independent rounding.

The commercial sector includes commercial combined-heat-and-power (CHP) and commercial electricity-only plants.

The continuity of these data series estimates may be affected by changing data sources and estimation methodologies.

¹ Thousand Short Tons ² Billion Cubic Feet ³ Thousand Barrels ⁴ Million Kilowatthours
