This table has been produced by The State Historical Society of Missouri, Columbia

Table F-3(continued)
Missouri Consumption of Energy by the Industrial Sector: 1960-2014
Part II — (physical units)

^a Natural gas as it is consumed; includes supplemental gaseous fuels that are commingled with natural gas.

^b Liquefied petroleum gases.

^c Beginning in 1993, includes fuel ethanol blended into motor gasoline.

^d Includes asphalt and road oil, kerosene, lubricants, and 16 other petroleum products

^e Conventional hydroelectric power. For 1960 through 1989, includes pumped-storage hydroelectricity, which cannot be separately identified.

N/A = Not available.

R = Revised data

¹ Thousand Short Tons ² Billion Cubic Feet ³ Thousand Barrels ⁴ Million Kilowatthours

Notes: Totals may not equal sum of components due to independent rounding.

The industrial sector includes industrial combined-heat-and-power (CHP) and industrial electricity-only plants.

The continuity of these data series estimates may be affected by the changing data sources and estimation methodologies.
