Table F-9(continued)
Missouri Industrial Sector Energy Price and Expenditure Estimates by Source: 1970-2014
Part I — (expenditures in million nominal dollars)

^a Natural gas as it is consumed; includes supplemental gaseous fuels that are commingled with natural gas.

^b Liquefied petroleum gases.

^c Beginning in 1993, includes fuel ethanol blended into motor gasoline.

^d Includes asphalt and road oil, aviation gasoline, kerosene, lubricants, and other petroleum products

^e Wood, wood-derived fuels, and biomass waste. Prior to 2001, includes non-biomass waste.

^f There is a discontinuity in this time series between 1988 and 1989 due to the expanded coverage of the use of wood and biomass waste beginning in 1989.

^g There are no direct fuel costs for hydroelectric, geothermal, wind, photovoltaic, or solar thermal energy.

^h From 1981 through 1992, includes fuel ethanol blended into motor gasoline that is not included in the motor gasoline column.

R = Revised data

— = No consumption, including cases where adjustments were made.

Notes: Expenditure totals may not equal sum of components due to independent rounding.
